BARTLETT TOWN SCHOOL DISTRICT

To the Citizens of Bartlett Town School District:

In compliance with the law and the usual custom, we hereby submit for your consideration the following report for the fiscal year ending February 15, 1917. As a part of our report is included that of the superintendent of schools.

SCHOOL BOARD

Members	Term expires
Harry Kittredge	1917
William H. Whitaker	1918
Walter Pitman	1919

ORGANIZATION

Chairman,	Harry Kittredge
Secretary,	William H. Whitaker
Treasurer,	A. L. Stillings

SUPERINTENDENT'S REPORT

Mr. Chairman and Gentlemen:

I have the honor to submit for your consideration my fifth annual report of the Bartlett Town School District, it being the sixth in the series of such reports.

The new State Program of Studies which was adopted by a vote of the Board has been followed as closely as is consistent with the change from the old to the new. It will take about two years to make a complete transfer. Some phases of the new course—domestic science, manual training and agriculture—have not been attempted for want of funds. The standard tests begun last year have been continued. Some of the findings will be reported later.

The school at Hill Town was opened again last fall. This school is very small and the per capita cost for maintenance is excessive. It would seem that those children ought to be transported for a much less expense and in a comfortable manner. To do this the most effectively, it will be well to begin the school early in August and continue the spring term till about the first of July. This will give the school year during the best months of the year when the roads are in good condition. Is it not worth considering?

ATTENDANCE BY SCHOOLS

School	Teacher	No different pupils registered	Aggregate No days lost in 17 weeks
Hill Town	Inez M. Jackson	6	18
Lower Bartlett	Josephine M. Pratt	26	87
Glen	Alice G. Martin	25	132.5
Goodrich Falls	Arthur G. Lord	10	40.5
Total,		67	278

REGISTRATION (Town District)												Totl by grades
GRADE	6	7	8	9	10	11	12	13	14	15		
I	3	6									9	
II		5	12	6	1						24	
III											0	
IV			1		4	3					8	
V				1	2	1	1	1			6	
VI						3	4	1			8	
VII							2	3	3	1	9	
VIII									1	2	3	
	3	11	13	7	7	7	7	5	4	3	67	

The above is corrected to October 1, 1916 and shows the number of pupils in each grade at the different ages; the total number in all the grades; the number at the same age in school; the number at age or where they belong chronologically; the number of precocious or those in advance of where their age would naturally place them; and the number of retarded or backward children.

There are 19 or 28.3 per cent. over age or retarded pupils; 2 or 3 per cent. precocious children; and 46 or 68.7 per cent. who are at age.

The diagram becomes clear when it is read as follows: In the first grade there are 3 pupils six years old, 6 who are seven (these are at age being between the two broken diagonally lines), and there are a total of nine in the grade; in the second grade, we read that there are 6 children who are nine years old and one ten—one and two years retarded respectively; in the fourth grade, we read that there is one child 8 years old or one year in advance of where he would be according to his age—precocious; and from the totals by years, we read that there are 3 pupils in schools who are six years old, 11 who are seven years old, etc.

EYE AND EAR TESTS

In looking over my records, I find that all of the children in the district have not been tested for sight and hearing. This will be completed as soon as school opens in the spring. Of the 28 tested, 18 or 65 per cent. were found defective in sight while none were defective in hearing. Of the 18 who were defective in eyesight, 11 were serious enough for me to call the parents' attention to the fact. It is hoped that those parents will be sufficiently interested to have the children examined by a specialist to see if some remedy can be prescribed. A child with very defective eyesight is seriously handicapped in his school work.

REPAIRS

The Glen school house has been remodelled. It now has a good floor, good lighting from the left and rear, slate blackboards placed opposite the windows, a good book and supply closet, a small warmed lunch

room in which the little ones may play in cold and stormy weather after their work is completed, and good separate toilets for the boys and girls with the only entrance to them through the school room. To make this building nearly ideal, we need a jacketed stove, adjustable, movable desks, the wood shed moved so as to be entered from the school building and the yard graded.

A new floor has been laid in the Lower Bartlett school house. The lighting in this building is from four sides. This should be changed and could be done at a reasonable expense. The toilets should be connected with the school building by closed walks and be better lighted. The wood shed is in need of repair. When the lighting is changed some slate blackboards should be purchased.

Slate blackboards are needed at Goodrich Falls. The present ones are useless for effective work.

All repairs need not be done in one year but a progressive policy should be adopted and one building remodelled as it should be each year till all are as they should be. The same plan may be followed as to furnishings.

CONCLUSION

I wish to take this opportunity to thank the School Board and citizens in behalf of the children for putting the Glen school house and out buildings into decent condition for school purposes. May the good work begun go on.

Respectfully submitted,

ALONZO J. KNOWLTON,
Superintendent of Schools.

NEW HAMPSHIRE DEPARTMENT OF PUBLIC
INSTRUCTION, CONCORD.

September 22, 1916.

Mr. William Whitaker,
Glen, N. H.

Dear Mr. Whitaker:

I wish to congratulate you upon the changes which you have made in the school house at Glen. The work is very creditably done and the building in all respects very satisfactory. I am sure that the community owes to you and the members of your committee its thanks for making a school house that will be wholesome for the children of the district.

Superintendent Knowlton said that you hoped to be able to get a ventilating stove. I, too, hope this may be done as it will be in all respects a great advantage over the method formerly used.

Very truly yours,

E. W. BUTTERFIELD,
Deputy State Superintendent.

TOWN SCHOOL DISTRICT

E. O. GARLAND, *Treasurer.*

This is to certify that I have examined the accounts of the Board of Education and Treasurer and find them correctly cast and properly vouched.

FRED L. GARLAND, *Auditor.*

Report of Bartlett Special School District

To the Citizens of Bartlett Special District:

In compliance with the law and the usual custom, we hereby submit for your consideration the following descriptive, statistical and financial report of the Bartlett Special School District for the year ending February 15, 1917. As a part of our report is included that of the superintendent of schools.

School Board	Term expires
Charles E. Allen,	1917
Walter H. Webb,	1918
C. H. George,	1919

ORGANIZATION

Chairman and Secretary,	Charles E. Allen
Treasurer,	E. O. Garland

Superintendent's Report

Mr. Chairman and Gentlemen:

I have the honor and pleasure to submit for your consideration my fifth annual report of the schools of Bartlett Special District, it being the sixth in the series of such reports.

The new State Program of Studies which was adopted has been followed as closely as is consistent with a change from the old to the new. The complete transfer will require about two years. The work of domestic arts, manual training and agriculture outlined in it have not been attempted for want of funds.

The first year of high school work introduced this year is meeting with success. There are eleven in the class and they are doing good work. I feel that all will agree that the investment is yielding a good dividend. If all the classes should remain, I think it would be worth while to engage another teacher for the building and introduce the second year of high school work.

The standard tests begun last year have been continued. Some of the findings will be reported later.

MUSIC AND DRAWING

The work in these departments has been under the efficient supervision of Miss Marion M. Stephen, a graduate of the Thomas Normal Training School, Detroit, Mich. Her services are secured by co-operating with the Conway school district.

The work in music in the primary grades consists of rote songs carefully selected and lays the foundation of future musical work; theory work and sight reading have been taught in the third and fourth grades; one and two part rote songs are taken up with other work in the fifth and sixth grades; while in the seventh, eighth and ninth grades are taken up the development of minors and the more difficult sight reading in the base as well as the treble clef.

It is expected that the children will give an exhibit of their accomplishments in the form of an entertainment soon.

The work in drawing is carefully graded and includes folding, paper cutting and crayon work in the primary grades; pencil, crayon and brush work in the other grades. Practical illustrations are made in the different seasons appropriate to special days.

ATTENDANCE BY SCHOOLS

School	Teacher	Aggregate for 18 weeks of school year 1916-1917		
		Different pupils registered	No. days lost	No. tardy
Primary	Lucille Norcott	39	181	20
Intermediate	Mayola F. Furber	40	119	11
Grammar	Ralph H. White	27	113	48
High	Ralph H. White	12	41.5	35
Total,		118	454.5	114

The tardy marks are excessive. There ought not to be more than five or six in a year with a school of this size. The time lost is more than should be expected. It means nearly four days (3.85) for each child registered in the 18 weeks.

It occurs to me that our attendance would be improved if the attendance officer should look up all absences promptly when reported and the teachers should report all cases at once or one-half hour after the opening of school.

EYE AND EAR TEST

School children in the district have been tested as to sight and hearing with the following results: number tested, 109; number found with defective eyes 38

or 34.8 per cent.; number found with defective hearing 15 or 13.7 per cent. Sixteen cases of defective eyesight and fifteen cases of defective hearing were serious enough for me to call the parents' attention to the fact. It is hoped that those parents will be sufficiently interested to have the children examined by a specialist to see if some remedy can be prescribed. A child with either sight or hearing defective is handicapped in his school work.

ADENOIDS

Quite a number of pupils in our schools are afflicted with adenoids. Some are so serious that they should be removed before a permanent injury is done the child. Adenoids seriously interfere with the health and school work of a child.

REGISTRATION (Special District)																Total by grades
GRADE	6	7	8	9	10	11	12	13	14	15	16					
I	13	10		1												24
II		8	3	1	2											14
III		1	7	7	2											17
IV				3	4	1	2									10
V					4	5		1	3							13
VI					1	4	3									8
VII							3		1							4
VIII							2	3	4	3	1					13
IX									8	2	1					11
	13	19	10	12	13	10	10	4	16	5	2					114

The above is corrected to October 1, 1916 and shows the number of pupils in each grade at the different ages; the total number in all the grades; the number at the same age in school; the number at age or where they belong chronologically; the number of precocious or those in advance of where their age would naturally place them; and the number of retarded or backward children.

There are 19 or 16.6 per cent. over age or retarded pupils; 4 or 3.5 per cent. precocious children; and 91 or 79.9 per cent. who are at age.

The diagram becomes clear when it is read as follows: in the first grade there are 13 pupils six years old, 10 who are seven years old (these are at age being between the two broken diagonal lines), one child nine years old or two years retarded, and there are a total of 24 pupils in the first grade; in the third grade, we read that there is one child 7 years old or one year in advance of where he would be according to his age—precocious; in the fifth grade, we read that there are 3 pupils who are 14 years old or three years retarded; and from the totals by years, we read that there are 13 pupils in school who are six years old, 19 who are seven years old, etc.

REPAIRS

The common toilets for the separate rooms have been changed so that there are now, on each floor, separate flush closets for the boys and girls. This is as it should be. The board did a good thorough piece of work. It is a credit to the district.

The roof of the school building has been shingled to prevent the numerous leaks.

NEEDS

Our needs are a new flag pole, building painted outside, plastering repaired now that the roof is tight, the walls tinted, the ceilings whitened, the woodwork varnished, some of the windows repaired, the furnaces repaired or else some other form of heat installed, new curtains purchased (those manufactured by the Allen Shade Holder Co. are perhaps the best), and the black-board at the front of the primary room lowered.

CONCLUSION

I wish to take this opportunity to express my appreciation of the co-operation which teachers, pupils, school board and citizens have given me during the past year in an effort to raise the standard of the schools.

Respectfully submitted,

ALONZO J. KNOWLTON,

Sueprintendent of Schools.

North Conway, N. H., Feb. 15, 1917.

VITAL STATISTICS.

TO THE SELECTMEN:—In compliance with an act of the legislature passed June Session, 1887, requiring clerks of towns and cities to furnish a transcript of the record of births, marriages, and deaths to the municipal officers for publication in the Annual Report, I hereby submit the following:

BIRTHS.
